Temperature Observations

Item	Location	Temp	Item	Location	Temp	Item	Location	Temp
chicken	final cook	174	beef	hot hold	175			
churizo	reach in cooler	42	chicken	hot hold	174			
beef	reach in cooler	43	cheese	hot hold	136			
chicken	reach in cooler	42	cooked beef	walk in cooler	45			
cut tomatoes	reach in cooler	44	hot water	3 comp sink	154			
cut tomatoes	make unit	45						
raw chicken	walk in cooler	42						
rice	hot hold	156						

Observations and Corrective Actions

Violations cited in this report must be corrected within the time frames below, or as stated in sections 8-405.11 of the food code.

- 4 An employee beverage was found on a food prep surface in the rear prep area. All employee beverages must have a lid and straw and must be stored on lower shelves or in a manner that prevents contamination of food and food prep areas.
- 13 Raw beef, pork, and chicken were found stored above raw shrimp and vegetables in the stand up reach in cooler on the cook line. Keep items stacked on shelves in refrigeration units in order of final cooking. E.G. (from bottom to top shelves) poultry, ground beef, beef, pork, shell eggs, seafood, cooked / vegetables / ready to eat. An employee was observed cutting raw chicken on the drain board of a sink that was currently being used to thaw ground beef. These two items cannot be prepared in the same area at the same time due to the differences in the final cook temperature of the food items. Do not prep raw chicken and raw ground beef in the same prep area at the same time. Complete prep of one species of meat and clean and sanitize the area before moving on to the next.
- 14 Several utensils were found dirty. Take more time when cleaning and sanitizing these items.

Comment Addendum to Food Establishment Inspection Report

Establishment Name: EL PAISANO

Establishment ID: 3034011688

Observations and Corrective Actions

Violations cited in this report must be corrected within the time frames below, or as stated in sections 8-405.11 of the food code.

- 33 Ground beef was found thawing in the bottom of a prep sink under warm running water. This is not an approved thawing method. When using water to thaw food items the temperature of the water must be 70 F or less, the food must be in a container large enough to submerge the entire item to avoid thawing only a small portion of the item, and the water shall have sufficient velocity to float off debris. Thawing may also be completed in refrigeration units or as part of the cooking process.
- 37 Several pans of food were found stacked in the rear reach in freezer with no barrier between the food in the bottom pan and the bottom of the top pan. A barrier must be placed between the bottom of the top pan and the food below to prevent possible cross contamination. Employees were observed scooping ice with buckets and cups rather than the ice scoop. The ice scoop must be used to prevent cross contamination of the ice by utensils or hands. Beverage pitchers were found in the dining room unprotected. If beverage pitchers are to be stored in the dining area they must be covered to prevent cross contamination.
- 42 Clean utensils were found stored in dirty bins. The utensil storage bins must be cleaned on a regular basis.
- 45 Replace the missing cover on the bottom of the rear reach in freezer.
- 47 Cleaning is needed on the exterior of cook line equipment and the interior of reach in refrigeration units.
- 49 If the hose and spray nozzle are to remain attached at all times a back flow preventer rated for continuous pressure is required between the hose and the faucet.
- 53 Cleaning is needed on the walls of the rear prep area.

Comment Addendum to Food Establishment Inspection Report

Establishment Name: EL PAISANO

Establishment ID: 3034011688

Observations and Corrective Actions

Violations cited in this report must be corrected within the time frames below, or as stated in sections 8-405.11 of the food code.

Spell

- 54 Lighting levels throughout the facility are too low (on the cook line 13 Ftc to 50 Ftc, in the rear prep area 11 Ftc to 24 Ftc, and in the dish cleaning area 11 Ftc to 24 Ftc). The required light level for all food prep areas is 50 Ftc, and for dish cleaning areas it is 20 Ftc.
