Observations and Corrective Actions

Violations cited in this report must be corrected within the time frames below, or as stated in sections 8-405.11 of the food code.

- 1 The person in charge of this facility has not completed an approved food safety course. By January 1, 2014 the person in charge of this facility must complete an approved food safety training course.

- 45 Repair the condensate leaks in the walk in freezer and reach in cooler below the make unit. No evidence of food contamination was found today, but as condensate is considered wastewater do not store food items below the damaged or leaking areas until leaks are repaired. Repair the rusted / damaged shelving and shelving supports throughout the facility. Replace the damaged vents on the hood system. The grease collection pipe and receptacle above 3 compartment sink and the utensil drying rack must be moved due to the risk of cross contaminating the utensils. According to maintenance personnel the pipe drains grease from the portions of the hood system located on the roof. The maintenance tech was instructed to call Alex Ellis with the City of Winston Salem Building Inspections Mechanical Division. Please a submit a plan for the relocation of the pipe or the corrective action before beginning work to Craig Faircloth with FCHD.

- 47 Cleaning is needed the interior and door gaskets of refrigeration units, the exterior of equipment, and the bread storage unit above central prep area.

- 53 Cleaning is needed on the floors along baseboards and in corners below equipment in the front service area. Reseal or replace all damaged floor and baseboard tiles throughout the facility.
